

GOING TO DISNEY WORLD! (2019)

Susan, a single Mom of a 13 year old son and 15 year old daughter was diagnosed with metastatic colorectal cancer that spread to her lungs and bones.

Susan says she was *“speechless and overwhelmed”* when she found out her application was approved and a recipient of a wish from Dreams to Memories. *“THANK YOU, THANK YOU, THANK YOU, I had never been on a plane with my kids let alone gone away for more than a weekend. I quickly and easily chose Disney world as our destination.”*

She knew her children always wanted to go to Disney but couldn't afford it.

On March 17, 2019 Susan and her children flew from Toronto to Orlando and enjoyed a four night stay in Disney World.

Susan said they had a blast and was proud to say she managed to go on every ride that her kids went on.

Susan went on to say:

“The memories that we made throughout the entire journey (airport, flight, shuttle, resort and the kids wheeling me around in a wheelchair) will never be forgotten. Thank you to everyone at your organization for giving us a fantastic opportunity and experience of a lifetime.”
